# Requirements

- V5R3 or higher.
- Compatible with i5/OS V5R3 and V5R4, and IBM i 6.1, 7.1, and 7.2.
- Ability to sign on to the IBM i with \*ALLOBJ authority.
- Must be current on the latest Cumulative PTF Package, HIPER Group PTF, and Database Group PTF for your operating system release.
- License keys are required. Ensure you have obtained a product license prior to installing the product.

# Installation and Upgrade Instructions

1. Create a temporary directory on your PC: **C:\TEMP**.
2. Download the PeekPlus 3.5 application to the temporary directory. If you're a new user, you should have received an email message containing the download link. If you don't have it, contact your Bytware Regional Manager.
3. Unzip the file to the **C:\TEMP** directory.
4. Open a DOS window (Click **Start > Run**, type **COMMAND**, and press Enter). Then, type the following commands:
  - a. **FTP**, then press Enter.
  - b. **OPEN**, then press Enter.
  - c. Type your IBM i system name or IP address, then press Enter.
  - d. If necessary, type your username and password, then press Enter.
  - e. **QUOTE RCMD CRTSAVF QGPL/PP350**, then press Enter.
  - f. **BIN**, then press Enter.
  - g. **PUT C:\TEMP\PP350 QGPL/PP350**, then press Enter.
  - h. **BYE**, then press Enter.
5. Sign on to the IBM i with \*ALLOBJ authority and run the following commands:  
**RSTOBJ OBJ(\*ALL) SAVLIB(QTEMP) DEV(\*SAVF) SAVF(QGPL/PP350)**  
**QTEMP/PPINSTALL**
6. To go to the main PeekPlus menu, type **PEEKPLUS/PEEK** on a command line and press Enter.
