Using scClient

When the Accelerate module for EFT is enabled, the EFT administrator can copy an scClient link in the administration interface and paste it into any supported browser or email it to end users to install on their desktops. scClient licenses are concurrent. That is, if you purchase 5 licenses, 5 people can log in at a time. If a 6th person logs in, a message appears stating that no licenses are available.

When the scClient is downloaded, the IP address of EFT is coded in the installer. You can only upload and download files to/from EFT at that IP address. You cannot specify a different IP address or port.

To use scClient

- 1. Open the web browser and type or paste the web address provided by your EFT administrator into the address bar of your browser.
- 1. The installer, scClient.exe, is downloaded to the **Downloads** folder of your browser (e.g., C:\Users\myname\Downloads).
- 2. Double-click the executable to open the client.

Item	Description
File > Exit	Close scClient
View > Show Application Log	Displays scClient history in the Logs pane
Edit > Options	Displays message box to enable or disable acceleration transfers and tells you that outbound UDP port 8443 must be open for accelerated transfers. Do not change any setting unless your EFT administrator asks you to change it.
Help > About	Displays the version number of scClient.
Upload	Displays the Open dialog box in which you can select files to upload.
Download	Displays the Select dialog box in which you can select files to download from the server.
Refresh	Refreshes the display of remote files.
Pause	Pauses a transfer in progress
Resume	Resumes a paused transfer
Clear List	Clears the Transfer Status pane

To download files

- 1. In the **Remote Files** pane, select one or more files to download, then click **Download**. The Windows **Select Folder** dialog box appears.
- 2. Specify the folder to which you want to download the file(s), then click **Select Folder**. The files immediately begin to download. You can track the download status in the **Transfer Status** pane.
